PROFESSIONAL SUMMARY

Product designer focused on making complex tools feel simple. Currently at Goldman Sachs on the Human Capital Management team, designing internal tools in Figma that serve groups across the firm and working through the firm's enterprise design system. Use AI-augmented design tools in daily workflow and explore AI product design in side projects. Previously worked on a 0-to-1 CRM for Tiberon Systems and led UI design for the 1st-place mobile game at the DSCVR Buildathon. Comfortable across enterprise, B2B SaaS, and consumer surfaces.

EDUCATION

Mento Design Academy, UX Design Bootcamp
2024 - 2025

Savannah College of Art & Design, Savannah, GA
2021 - 2024
BFA, Animation - Story and Concept

WORK HISTORY

Goldman Sachs, Dallas, TX
Product Designer · August 2025 – Present

- Design internal tools in Figma on the Human Capital Management team, supporting teams across the firm — recruiting, rewards, firm-wide operations.
- Partner cross-functionally with PMs, engineers, and stakeholders to take projects from briefing through wireframes, prototyping, and review — running iterative feedback cycles across multiple concurrent workstreams.
- Build interfaces using and extending Goldman’s enterprise design system, contributing reusable components and improving information architecture across legacy tools.
- Use AI-augmented design tools (Figma Make, generative AI for ideation) in daily workflow to accelerate exploration and prototype generation.

Tiberon Systems, Houston, TX
Product Designer (Contract) · February 2025 – May 2025

- Sole product designer for a responsive CRM built from scratch in Figma for desktop and mobile, owned end-to-end from user flows through high-fidelity prototypes.
- Built a comprehensive design system of 20+ reusable components and design tokens, ensuring consistency across platforms.
- Partnered autonomously with engineers in an early-stage startup environment, translating technical constraints into shipped UI on aggressive timelines.

DSCVR Freelance, Remote
Product Designer (Contract) · September 2024 – October 2024

- Designed full UI in Figma for Pixel Arena, the 1st-place winning mobile game at the DSCVR Buildathon, partnering with a developer in tight feedback loops to ship a polished build under competition deadline.

AWARDS

1st Place - DSCVR Buildathon 2024

SKILLS

Design Tools: Figma, Figma Make, Claude Design

Core Competencies: Product Design, Design Systems, AI Product Design, Generative AI, Interaction Design, Prototyping, Wireframing, User Research, Usability Testing, Information Architecture, Visual Design, Motion Design, Responsive Design, Mobile Design, Component Libraries, Design Tokens, Accessibility

Methodologies: Cross-functional Collaboration, Agile, Lean UX, 0-to-1 Product Development, Product Thinking, Enterprise UX, A/B Testing, User Journey Mapping
